

DOUBLE-HUNG WINDOWS: LIGHT IN ABUNDANCE

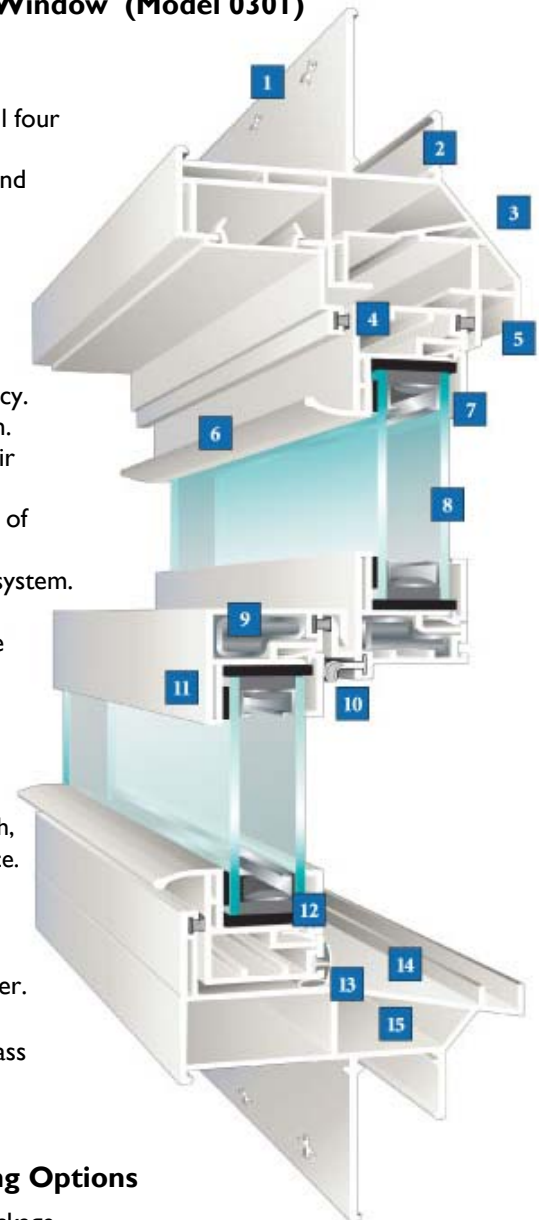

Superior beauty, thermal efficiency and overall performance shine through with Alside's Performance Series Double-Hung windows. Designed for strength and larger glass exposure, they feature two easy-to-clean tilt-in sashes to make any cleaning chore a breeze.

New Construction Double-Hung Window (Model 0301)

1. Integral 1 3/4" prepunched nail fin on all four sides for easier installation.
2. J-channel receptor on side jambs, sill and header.
3. Beveled exterior mainframe.
4. Double-barrier fin weather stripping.
5. Concealed screen track.
6. Fully-extruded lift rail.
7. Exterior drop-in glazing.
8. Low-E/Argon glass for thermal efficiency.
9. Reinforced lock rail for added strength.
10. Interlock at meeting rail for reduced air infiltration and added security.
11. Tilt-in top and bottom sashes for ease of cleaning.
12. High performance warm edge spacer system.
13. Protective hollow bulb seal.
14. Sloped sill forces water to drain to the exterior.
15. Multi-chambered design for energy efficiency and reduced noise.

Plus these additional features:

- Solid vinyl frames and sashes for strength, energy efficiency and ease of maintenance.
- Mitered and welded construction for strength and beauty.
- Stainless steel constant force balance.
- Color-coordinated cam lock and keeper.
- Dual vent locks.
- Extruded aluminum frame with fiberglass half-screen.

Double-Hung Options

- ClimaTech® Insulated Glass Package
- Colonial grids between the panes
- Factory-mulled twin and triple units available
- Full complement of installation and finish accessories
- Available in white and beige
